Forecast for Saturday 14 May 2022

Weather: Cloudy at times during the early hours, with low cloud bringing poor visibility over many summits, especially in the west and south. Cloud lifting quickly through the morning with sunny spells developing quite widely. Remaining dry through the afternoon with sunny spells at first but becoming cloudier by evening with scattered, possibly heavy showers spreading in from the south.

Chance of cloud-free hill tops above 600m: 10% rising to 100% by mid-morning, then falling to 80% in any evening showers.

Low cloud and visibility: Broken cloud will cover many slopes above 400-500m in the west and south during the early hours, but this will lift after dawn to be clear of all summits by mid-morning. Patchy cloud will develop temporarily on slopes above 800m in evening showers. Very good visibilities outside of cloud with distant hills clearly visible, but visibility falling to a few km in any evening showers.

Forecast for Sunday 15 May 2022

Weather: Showers will continue during the early hours of Sunday morning with the odd heavier one possible before they ease around dawn. Some light showers will continue during Sunday morning, these clearing in the afternoon leaving a few sunny spells.

Maximum wind: East to southeast 15-20mph.

Chance of cloud-free hill tops above 600m: 80% during the early hours falling to 10% after dawn. Improving to 100% after midday.

Low cloud and visibility: Patchy cloud near 600m in showers during the early hours with the main cloud base above the summits. More widespread low cloud will develop after dawn to cover most slopes above 400-500m, but that cloud should gradually lift after midday so that by mid-afternoon it will be clear of the summits. Visibility generally good below cloud, but falling to a few km at best in showers.

Temperature: **Valleys:** Plus 10 Celsius becoming plus 19 Celsius.
At 600m: Plus 9 Celsius becoming plus 14 Celsius.
Freezing level: Above the summits.
